A Sabin-led transdisciplinary alliance to prevent human Papilloma Virus (HPV) and eliminate cervical cancer, prioritizing low and middle-income countries.

**Areas of Focus**

**PREVENTION**
Introducing and expanding HPV vaccination

1 in 7
Vaccine introduced in 2006. Only 1 in 7 eligible girls currently vaccinated.

**SCREENING**
Expanding provision and access to cervical cancer screening

4 in 10
Just 4 in 10 women get screened for cervical cancer in low and middle-income countries.

**TREATMENT**
Improving access to treatment of precancerous lesions with point of care ablation devices

**What We Know**

- Every 90 seconds, we lose a woman to cervical cancer
- 90% of these women live in LMICs
- 85% of women impacted are young
- Vaccines can prevent almost all cervical cancer deaths if given early enough
- Timely screening and affordable and accessible treatment can catch and potentially eliminate the disease.

**If We Do Nothing**

53% INCREASE IN DEATHS GLOBALLY
